

Certification Application

"Plan-Do-Check-Act" within the ISO 27001 ISMS requires auditing. The CIS ISO 27001 Lead Auditor training will complete your ISO 27001 understanding gained in previous CIS risk management and information security courses by ensuring you also understand how to apply the ISO 19011 and ISO 27007 ISMS auditing standards to an ISMS audit program.

ISO/IEC 27007 provides guidance on managing an information security management system (ISMS) audit program, on conducting the audits, and on the competence of ISMS auditors, in addition to the guidance contained in ISO 19011. ISO/IEC 27007 is applicable to those needing to understand or conduct internal or external audits of an ISMS or to manage an ISMS audit program.

This credential is applicable to those needing to understand or conduct internal or external audits of a risk management system supporting an ISMS, or how to manage an ISO 27001 ISMS audit program. This is the only ISO 27001 Lead Auditor training and professional examination program to incorporate ISO's 27007 standard as core content within its program.

Building upon the foundation understanding of the ISO 27005 risk management framework and ISO 27001 framework validated by the Certified Internal Controls Architect credential, the ISO 27001 Lead Auditor certification by CIS certifies your ability to audit the formal structure, governance, and policy of an ISO 27001 conforming Information Security Management System (ISMS). Furthermore, the ISO 27001 Lead Auditor certification ensures that you are qualified to assure strategic objectives according to core ISO 27001, 27002, 27003, and 27005 best practices.

Upon completion of this training and certificate program, you will:

- be equipped with knowledge and skills required to perform audits of Information Security Management Systems (ISMS) against the ISMS standards;
- expand your auditing competency;
- increase your credibility through gaining international recognition; and
- improve your résumé and help to increase your earning potential.

The ISO 27001 Lead Auditor certification is available to qualified candidates who:

1. **Are a member of CIS in good standing.** If you are not already an Associate member of the CIS certification student body, you must first become a member to pursue the ISO 27001 LA credential. Please see <https://www.certifiedinfosec.com/estore/cis-membership/cis-body-of-certified-professionals-detail> for further details.
2. **Attend the required CIS approved curriculum courses.** Seminars may be attended at **live instructor-led sessions**, **online**, or a combination of both.
 - CIS Policy Workshop: *ISO 31000 Enterprise Risk Management*
 - CIS Policy Workshop: *ISO 27001 Information Security Management*
 - ISO 27001 Lead Auditor
3. **Pass the ISO 27001 Lead Auditor Exams.**

For ISO 27001 Lead Auditor certification by CIS, candidates must pass CIS online exams RM101, ISMS101, ISMS102, and ISMS103. CIS exams are administered online and can be taken at your convenience at your home or work through the CIS Learning Center, where your progress and score are monitored and recorded centrally. Your exam results are provided to you automatically upon completion of your exam.
4. Complete and submit this application kit to the Certification Department at certification@certifiedinfosec.com.
