

# Certification Application

ISO 37301 CCP™ is the compliance management certification appropriate for managers at every level, including top management at the officer and vice president level. This certification validates competence and understanding for developing and managing a custom risk-based compliance management system and methodology based upon the ISO Compliance Management System framework.

Running an organization requires leadership and teamwork across the entire organization - not just a piece of it. Likewise, establishing, managing, and integrating effective GRC throughout the enterprise requires the same leadership and team members to be trained to support effective GRC together.

Upon completion of this training and certificate program, you will:

- be equipped with knowledge and skills required to develop, manage, monitor, and improve a Compliance Management System in line with the ISO 37301 standard of best practices;
- expand your compliance management competency;
- increase your credibility through gaining international recognition; and
- improve your résumé and increasing your earning potential.

The ISO 37301 Compliance Professional certification is available to qualified candidates who:
